

NEW VACANCY

The Outboard Centre Ltd is a family run business with over 32 years' experience in the industry offering reliable and friendly support for all things 'outboard' related. We offer a range of services designed to make our customers boating experience as enjoyable as possible.

We offer complete boat management from haul out to valeting, winterisation and winter storage. Our products and services include outboard engineering, engine repairs, boat maintenance, launch and recovery, emergency call out, antifouling, valeting, winter storage and engine winterisation and full technical support.

We are looking for hard working and enthusiastic individuals to join our rapidly expanding team of marine technicians and boat yard operatives to help us to deliver a first rate customer experience.

Working with our experienced Marine Engineers, you will be assisting with a wide variety of roles such as washing and valeting boats, antifouling and copper coating, moving, towing and mooring boats.

The successful candidates will learn

- how to move boats and secure boats safely and efficiently
- complete Boat Management/Yacht Care
- how to use specialist marine equipment and tools
- basic Marine Engineering knowledge including boat mechanical and electrical systems

This position requires individuals who are dependable, self starters, able to work independently and use own initiative. We are looking for prompt and reliable individuals who are committed to providing a high quality customer service to include anticipating and understanding needs, managing expectations and communicating challenges or delays that may occur.

Experience with boats, repairs and maintenance would be preferable but training will be provided in all areas.

We offer a competitive salary dependent on both experience and skills. The contract is for a 40 hour week, 8am to 6pm, with some additional early starts and Saturdays. Please note there will be a probation period of 3 months. A full, clean UK driving licence is essential.

Part time roles will also be considered.

A Marine Engineering apprenticeship scheme and a Powerboat Level 2 training course may be offered to successful candidates.
