

NEW VACANCY

Job Title: **Trainee Workshop Engineer – Arundel – England**

Job Summary

As a Trainee Workshop Engineer, you will be trained to diagnose faults and repair Refuse Collection Vehicle equipment.

We repair and refurbish a range of Refuse Collection Vehicles ensuring the standards set by Farid Hillend Engineering are met on all occasions. Your role will be to carry out repairs and refurbishments as directed by the Workshop Supervisor.

You will learn to fabricate and repair structural issues on Refuse Collection Vehicles as well as how to repair electrical and hydraulic defects. You will be trained on how to interpret technical drawings as well as electrical/hydraulic schematics.

Additional ad-hoc duties will arise; however, you will be required to take responsibility for workshop cleanliness, safety and supplies through the course of each shift.

Skills & Experience

- A genuine interest in working with electrical and hydraulic systems along with steel fabrication.
- You may already work with tools doing repair work or in your own time as a hobby be familiar with completing repair work on automotives and have a flair for fixing things.
- Good listening & communication skills both with colleagues and customers internally and externally.
- A can-do attitude and willingness to learn and be part of a hardworking team.
- Be able to manage workloads and prioritise effectively.
- Basic IT skills would be desirable.

Salary & Benefits

Competitive salary + benefit package. Please state on your application your salary expectations.
