# How do I log in?

Log into CCGOnline via the **Office 365 login** button. From the **Students** drop-down menu at the top of the page select **Library, Library Resources**. The EBSCO Discovery search box is located to the right of the screen.
# How do I search?

To start searching you can opt for a basic or advanced search.

## Basic Search
Type in your topic e.g. genetic engineering into the search box and click 'Search'. To narrow down the results you can filter by the menu at the top. **All filters** allows you to filter by publication date, content provider, source types, subject and geography etc. You can also use the quick filters (e.g. **All time**, **Source type**)

## Advanced Search
Click on **Advanced Search**. Enter your search term then click **All fields** to choose author, title, subject term etc from the drop down menus. Use AND, OR, NOT to combine terms. Scroll down for additional filter options if needed and click **Search**.

## How will the results appear?
Results are displayed in relevance order (change to by date newest if preferred). A Discovery search will also include e-books and all the library books held by CCG.

## Too many results?
If you have too many results try limiting your search using the **All filters** tab at the top for example by publication date, source types, subject, language or geography. Or by the quick filters (e.g. **Source type, All time**)

Click on Access Options to see the options for displaying the full record (e.g. pdf) and click the link.

# How do I use the results?

On the full record page use the menu on the top of the screen to download, listen, save, cite (to obtain bibliographic details for referencing), add to projects, share (e.g. email) and print.

Create a personal EBSCO account by clicking MyEBSCO at the top of the results page. Your account will allow you to make full use of the dashboard facility to the left of the results page. Using the dashboard you can see your search history & add saved items to your projects.

New search opens up a new search box and concept map is useful for filtering searches visually, in Grid or Map format.

# What if I still need help?

Click on **Help** under Research Tools or ask a member of library staff for assistance.
